

AXIS
WAKE RESEARCH

2017

A.W.R. / D.N.A.

Nobody knows watersports better than the people who live it. Designed, engineered and handcrafted in the U.S.A. and Australia by the same people who've made Malibu the world's number one towboat maker, Axis delivers Malibu technology and quality with extraordinary value. We design Axis boats with direct input from watersports pros, the innovators and dominators of wakeboarding and wakesurfing who help keep us on the cutting edge of wake and wave making.

Axis boats are unique from Malibu models, sharing their performance features in a user-friendly setting. In every Axis model, you get the remarkable Wake Plus Hull design and Performance Surf Package (P.S.P.) to create the best wakes and waves on the water, bar none.

Since its founding in 2009, Axis has remained focused on function-driven design and watersports performance. Affordability has made Axis the choice of many looking for the ultimate family toy. At the same time, Axis has become the go-to brand for many stern-drive boat owners looking for the greater safety of our V-drive technology. In fact, more than a third of recent Axis buyers switched from a stern-drive boat.

Centered on You

At Axis, we keep it simple. We focus on building performance watersports boats at a great value. You get a boat built on the same factory lines as a Malibu, by the same craftsmen and craftswomen, with the same quality. You get the technology and engineering that creates world-class wakes and surf waves. And, you get it all with exceptional value.

An Axis Wake Research boat comes from the factory ready to do whatever you want on the water: ride, surf, ski or just cruise. Do it all with boat models up to 24 feet long and room for up to 17 people.

Axis for 2017: Five Rides to Epic Watersports Adventures

Presenting the Axis Wake Research lineup for 2017. Five boats, five unique ways to transform a body of water into the watersports playground of your dreams.

The A series pickle fork design models give you more passenger room up front for a lounge feel. The T series models keep the look old school with a classic bow design, but with all the cutting-edge performance you expect from Axis.

We build both styles around the innovative Wake Plus hull and Performance Surf Package (P.S.P.), so you can choose your boat based on design preference.

We're so confident in Axis quality that we back it with a lifetime hull warranty, along with a 5-year comprehensive warranty for engines, trailers and components, including upholstery. You won't get this from most Axis competitors.

THE **AXIS**

P.S.P.

PERFORMANCE
SURF
PACKAGE

Go Ahead, Make Your Waves

Axis Wake Research offers remarkably affordable access to our Performance Surf Package (P.S.P.). Create your own waves wherever and whenever you want, and control their size, length, shape and speed.

The P.S.P. starts with the Wake Plus hull design engineered for each Axis model. Combine that with wave generating running surfaces and customized swim platforms. Then, for a bigger wake, flip a switch to fill the Hard-Tank Ballast system and add 800-1,000 pounds of wake-creating ballast (depending on the model). Get the fore and aft Plug 'n' Play ballast option to add another 1,250 pounds. For the biggest wake you've ever seen, equip your Axis with the Auto-Set Wedge hydrofoil. Drop it in the water and instantly gain another 1,000 pounds of wake-generating water displacement. In total, that's up to 3,800 pounds of wake-producing ballast.

Wait until you see how easy it is to turn that wake into an endless, customizable wave for surfing. Drop the Wedge and then flip a switch to activate Surf Gate™. That's it. The Surf Gate's high-speed hydraulic actuators let you quickly shift the wave from side to side for regular or goofy foot styles.

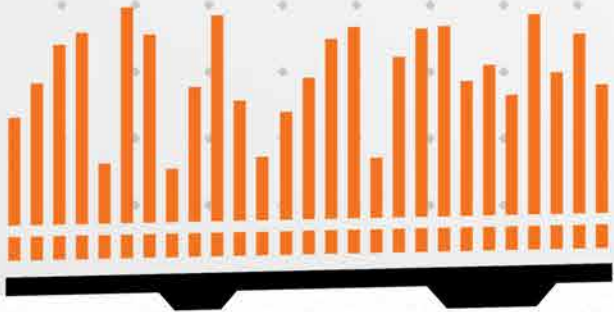

With the P.S.P. and Surf Gate, the driver can dial in the wakes and waves to make the perfect watersports playground for any rider, every time. Here's the big news for 2017: We've made the Surf Band wrist remote available for all Axis boats. Wearing the Surf Band, the rider can control the Surf Gate, speed and stereo volume right from the board.

Also new for 2017—a striking new dash design with glowing white 3-in-1 gauges gives the cockpit a classic sporty look. There's more function with a new central touch screen that integrates menu navigation, Surf Gate controls, speed control and more. A new panel of soft-key switches puts major controls at the driver's fingertips, and new helm and transom remotes for the audio system let the driver or passengers adjust the music.

Auto-Set Wedge

20

AXIS

The text "20" is rendered in large, bold, black, 3D block letters with a faceted, crystalline texture. Below it, the word "AXIS" is also rendered in large, bold, black, 3D block letters with the same faceted texture. The letters are set on a white floor with a grid of grey circles and lines.

TECHNICAL KNOCKOUT

Nothing on the water packs as much punch into a 20-foot package as the Axis A20, and nothing can touch its value, either. With its Wake Plus hull and standard 409 foot-pounds of torque, the A20 comes ready to shred. It's easy to trailer and store, yet kicks up a massive wake, especially with our available Auto-Set Wedge. Add the hydraulic Surf Gate and you've got the best wave-making technology available today.

PUNCHING WELL ABOVE ITS WEIGHT.

Our most affordable boat gives you incredible agility, plus room for 11 and lounge-like comfort thanks to the pickle fork design. Add up to 3,600 pounds of ballast with all options, including Plug 'n' Play and the Auto-Set Wedge. The 42-gallon tank ensures plenty of fuel for a day on the water. Make huge, surfable waves with the optional Surf Gate and make the water your playground. The A20 fits as easily into the average garage as it fits into your budget.

LENGTH	20' / 6.10m
BEAM	98" / 2.49m
DRAFT	27" / 0.69m
SEATING CAP	11 people

- 300% brighter underwater LEDs
- Gel and metal flake color options
- Surf Gate
- Auto-Set Wedge

See "Standard Packages & Options" for full information on all models.

22

MODERN CLASSIC

Meet the A22's classic-look cousin. Our first Axis boat with a traditional bow design, the T22 is anything but old school. Like all current Axis models, it's built on our renowned Wake Plus hull design. The optimized cabin layout gives you ideal, balanced weight distribution for a faster hole shot, less bow rise and a level ride. Excellent driver visibility enhances safety for all. All the performance wake- and wave-making technology you expect from an Axis is available, wrapped in a classic look with room for 15.

WHERE **TRADITION AND INNOVATION** COLLIDE.

The Axis T22 will show you just how roomy a 22-foot, traditional-bow watersports boat can be. With a cab-forward design, the T22 offers the largest lounge area in its class. You get seating for up to 15 and storage room for their gear, so everyone feels like a first-class passenger. The driver, meanwhile, will feel the renowned Axis agility and response thanks to an ideal level of water-surface feedback. Needless to say, the wake-and-wave performance is world class with the available Auto-Set Wedge hydrofoil and industry-first Surf Gate.

- Gel and metal flake color options
- Surf Gate
- Auto-Set Wedge

See "Standard Packages & Options" for full information on all models.

AXIS 22

THE DOMINATOR

The original Axis model is still delivering a wake that gives pros and bros their best set while not breaking the bank. It's also our best selling boat, and one reason is that its pickle fork design gives it knockout looks and room for up to 15. That makes it a great boat for family or friends. You won't believe that a 22-footer could make such mammoth wakes and waves. Credit our unequalled Wake Plus hull design and a performance-first profile. The A22 might intimidate the competition, but it can tailor the wake or wave for every skill level, so everyone has fun.

SINCE DAY ONE.

From beginners to seasoned pros, Axis customers love the A22 for its world class wake, ballast-making options and, of course, the incomparable wave-making Surf Gate. They love it for the available stereo with Bluetooth® and the Axis-branded drop-in coolers. They love the boat's rakish looks, but, mostly, they love turning a day on the water into an epic wakeboarding or surfing event.

LENGTH	21' 11"/6.68m
BEAM	102"/2.59m
DRAFT	27"/0.69m

- Gel and metal flake color options
- Surf Gate
- Auto-Set Wedge

See "Standard Packages & Options" for full information on all models.

2023

BIG CLASSIC

The Axis T23 just might be the best value in a 23-footer in all of watersports. It's a traditional-bow model like the T22, but adds another 17 inches of length to give you stretch-out, walk-around room for up to 16 people. It's pro wake surfer Johnny Stieg's favorite boat, so you're assured of killer waves. Big Monsoon power comes standard, of course. Everything about the T23 is big, except the price.

LARGE AND **IN CHARGE.**

Our biggest traditional-bow model handles like a dream and churns up world class wakes—and that's even before you lower the Auto-Set Wedge hydrofoil to make them even larger. Add the revolutionary Surf Gate to turn those wakes into surfable waves on either side of the boat. And remember, for the ultimate surfing experience, you can add the amazing Surf Band wrist remote for 2017.

LENGTH	23' 5" / 7.14m
BEAM	102" / 2.59m
DRAFT	27" / 0.69m
SEATING CAP	16 people
WEIGHT CAP	2,256 lbs.

AXIS 24

WAVE RAVE

Meet the biggest, baddest Axis on the water. The A24 gives you plenty of room for up to 17 aboard. Its size and 3,800-pound max ballast give you huge wakes and waves, yet the big A24 remains agile and easy to handle. The new 6.0-liter Monsoon V8 gives you all the torque needed to push a loaded boat with ease. So go ahead, create an endless summer for the whole family—and your friends.

PRO-LEVEL WAKES. EASY TO HANDLE.

The Axis A24 is a surfing adventure waiting to happen, with room for 17 and the most storage capacity in the Axis lineup. Size matters when it means you can carry up to 3,800 pounds of ballast, with 1,000 of that created by the wake-boosting Auto-Set Wedge hydrofoil. You've got ample power to move the whole crew easily thanks to 409 foot-pounds of torque from the Monsoon 6.0-liter engine. And a 70-gallon fuel tank can keep the fun going all day.

LENGTH	24' / 7.32m
BEAM	102" / 2.59m
DRAFT	32" / 0.81m
SEATING CAP	17 people

@tomfooshee

Tom Fooshee embodies everything that's awesome about being a pro wakeboarder. Known as "The King of Cable," Tom's ability behind the boat is just mind-blowing. You can't miss him when he's out ripping behind his A22 at Texas Ski Ranch in New Braunfels. A sharp wit and totally approachable, this 2010 Alliance Wakeboard Rider of the Year is another guy who just gets it and is always fun to be around.

@johnnystieg

@johnnystieg

Johnny Stieg is recognized for his fluid airs and raw, free-flowing tricks. With his spontaneous approach, this stylish wakesurfer always keeps things interesting. You never know what he's going to do next. Johnny's aggressive approach stands in contrast to his laid-back Cali personality. He's deeply rooted in his California upbringing and has spent countless days surfing every break up and down his home state's coastline.

@vandallharris

@vandallharris

Randall "The Vandall" Harris has been setting the bar for huge air and legit style since he was 13, when a lot of riders were still "ski-boarding." Randall founded West Side Riders (WSR), and his skills are off the charts. He rides ten feet longer than most pros and about five miles per hour faster, which lets him spend more time in the air and cover huge distances. He's taken home top prizes all over the world and snagged Alliance Wakeboard Rider of the Year twice—something no one else can claim.

LIQUID FORCE EDITION

IT'S EASY

BEING GREEN

Born out of the now legendary Brostock, Axis teamed up with world-famous board maker Liquid Force to create a special edition package that turns heads everywhere. Available on the Axis A22, A24 and T22 models, the Liquid Force Edition will make your boat the center of attention with iconic Liquid Force graphics, gorgeous metal flake gel coat in green and a bright white interior and tower.

TOWER

At Axis, we know the tower is an integral part of the watersports experience, something that should have the rider's full trust. That's why we make our AW15 tower in-house. Take a close look at the AW15 and you'll see engineering and build quality that excels the competition.

Get it in black, white or charcoal, and choose from our bimini designs, including an optional high-end Z5 hard shell bimini and a surfboard bimini. New for 2017, the optional swiveling board racks now have a high-durability black anodized finish.

AVAILABLE COLORS

HINGED BASE

FOR EASY STORAGE

AXIS**GO
BIG**

POWER

It takes a properly ballasted watersports boat to churn up a great wake, and it takes a high-torque engine to move the boat smoothly at watersports speeds. For 2017, Axis moves up to new 6.0-liter Monsoon V8s with 409 foot-pounds of torque standard.

Live near the ocean? Order your Axis boat with the Salt Resistance Performance package and you're set to go. From bow to stern, we installed all the enhancements needed to give you Axis durability in a saltwater environment. Highlights of this comprehensive package include hydraulic steering, a freshwater flush kit, grounding and bonding of all components below the water line, special sealants and much more. We believe it's the best saltwater package in the watersports industry, and we stand behind it.

BIG SURF SOUND

Nothing gets the adrenaline pumping while you're shredding like blasting your favorite music back at the board. The optional stereo kicks out the tunes through Wet Sounds speakers, while a new stereo black box by Medallion adds new helm remote, Surf Gate signaling through the speakers, multi-zone volume control and increased water resistance. Stream from your smartphone—just remember to leave it on the boat!

BLUETOOTH-EQUIPPED

A close-up, high-angle shot of a five-spoke alloy wheel. The wheel is covered in water droplets, suggesting it has been washed or is in the rain. The central hub features a stylized logo consisting of a star-like shape with three curved lines extending from it. The background is dark and out of focus, showing parts of the car's body.

ROCK OUT

THREE CUSTOM PACKAGES AVAILABLE

The Best Boats Deserve the Best Trailers

There's no better way to haul your Axis boat than with an Axis trailer. We hired the best team of craftspeople in the business to custom-build trailers that matched our boats in engineering and quality. We make Axis trailers in the same Loudon, Tennessee, facility where we build boats and where our corporate headquarters is located. When you buy a Axis trailer, you're assured that your Axis boat will fit properly and securely with no clearance issues.

You can order a customized trailer to match your Axis boat. Choose from numerous options, including two-tone paint, Rockstar wheels, stainless steel fenders, runway lighting and more. The highest quality materials and world-class workmanship at every turn assures the long-term durability you expect from Axis. That's why we back our trailers with a 5-year limited warranty.

WORLD-CLASS CRAFTSMANSHIP

Premium industry-standard steel for all frame parts.

Jigs and fixtures used to create consistent weld and axle placement, eliminating margin of error and ensuring axles and crossmembers are precision-placed.

All trailers are produced through the same model-specific frame jig, ensuring that frames, steps, crossmembers and axles are flat, straight and square. That's especially important for axle location and squareness (affecting how well a trailer tows behind your vehicle) and crossmember/bunk-tab location (affecting how well your boat loads on your trailer).

Fender steps are fully welded to the trailer frame. Other manufacturers use a rubber bond at the top of the step and weld only at the bottom.

Top-quality DuPont urethane-based paints and primer used, with side-draft paint booths, to prevent overspray on two-tone trailers and rotating carts, to ensure excellent coverage, coat thickness and consistency.

Rear corners, where main frames meet the propeller guard, are mitered instead of butt-welded, in order to provide better, stronger welds, improve weld aesthetics, and negate the need for an additional plate welded to the end of the main frame.

Tandem/tri-axle fenders have a center support brace to prevent the fender from bowing when stepped on.

STANDARD

- 5-Year Limited Warranty
- NMMA-Certified

COME SEE HOW IT'S DONE.

Call (865) 458-5478 or email research@axiswake.com to schedule a tour of our Loudon, Tennessee, factory—the global headquarters for Malibu Boats and Axis Wake Research. We'd love to show you around.

In a state-of-the-art facility on the banks of the beautiful Tennessee River—our primary testing waters—Axis boats are built right alongside our Malibu models by the same people, using the same processes and materials. You can walk the production lines with us and see the incredible artisanal craftsmanship that goes into every Axis, step by step. From the casting of performance hulls to the polishing of tower speakers, it's all centered on you.

Tennessee/Global Headquarters
5075 Kimberly Way, Loudon, TN 37774
